Person Platform

WITH FOOT PUMP

Specifications

Standard dimension	830x700x940 mm (LxWxH)
Material	Stainless steel AISI 304

Capacity

Lifting height	250 mm
Total height	Max 450 mm

About the product

The person platform is manufactured with a hydraulic cylinder with foot pump and does not require a tube connection for control. The foot pump is easily operated with the foot to raise and lower the platform.

Ergonomic design

The platform is designed with focus on ergonomics in all positions as well as ensuring the pedal is easy to use without having to strain yourself to adjust the height.

The person platform is manufactured with foot pump in order to free your hands when height adjusting. Therefore, it is not necessary to wash hands and change gloves after adjusting for the perfect and ergonomically correct working position.
